PROFESSIONAL PROFILE

Motivated Computer Science student at SRH Hochschule Berlin, graduating in March 2029, with hands-on experience in Python, object-oriented programming, SQLite databases, networking fundamentals, and secure software concepts. Built practical projects including an offline AI voice assistant, database-backed e-commerce application, banking simulator, TCP video chat prototype, and password-security demo. Seeking internship, working student, or entry-level Python/software development opportunities in Germany, bringing strong discipline, teamwork, and resilience developed through club football experience in Germany.

TECHNICAL SKILLS

Programming	Python, SQL basics, HTML/CSS basics, Java fundamentals
Software Engineering	Object-oriented programming, debugging, exception handling, input validation, clean code basics
Databases & Tools	SQLite, Git, GitHub, VS Code, command-line workflow
Networking & Security	Cisco Packet Tracer, TCP/UDP basics, password hashing concepts, basic AI/ML awareness

EDUCATION

B.Sc. Computer Science — SRH Hochschule Berlin | Oct 2025 – Expected Graduation: March 2029

- Focus areas: Python programming, object-oriented design, databases, computer networks, and software development fundamentals.
- Career target: internship / working student role in software development, Python development, or IT support in Germany.

SELECTED PROJECTS

AI Voice Assistant (Jarvis Clone) | Python, Vosk, gTTS

- Developed an offline voice-command assistant that recognizes spoken commands, launches applications, and automates desktop tasks.

Python E-Commerce Application | Python, SQLite

- Built product, cart, and order-management features with database persistence, CRUD-style logic, and input validation.

Password Storage & Cracking Demo | Python, SHA-256, Argon2id

- Created an academic security demo comparing fast hashes with memory-hard password hashing to explain real-world password protection.

TCP Video Chat Prototype | Python, TCP sockets

- Implemented and presented a client-server networking prototype covering packet transfer, reliable communication, and encryption concepts.

OOP Fighter Duel Game | Python, OOP

- Designed a console game using classes, inheritance, polymorphism, and randomized attack logic to demonstrate OOP fundamentals.

EXPERIENCE, CERTIFICATIONS & LANGUAGES

Club Football Player — SV Leutesdorf | Kreisliga C, Leutesdorf, Germany

- Played organized club football in Germany while balancing training, studies, and personal development.
- Strengthened teamwork, discipline, communication under pressure, and consistency through competitive sport.

Certification

- Cisco Networking Academy — Introduction to Packet Tracer (2026)

Languages

- English — Fluent
- Hindi — Native
- German — B2 / C1 in progress
